

the **Mind** factory INC

## Digital Advertising Solutions

The Mind Factory offers custom display solutions ranging from 7" to 50" LCD advertising system, and also scrolling LED signs.

Display solutions can be as simple as photo slide shows, or as complicated as complete high definition video playback system with integrated scrolling messages and timed video messages (commercials) interrupting the main video playback. All our systems will power back up after power failures and continue playing from where they left off.

Shown below right is one of our interactive shelf units, with 10 customizable buttons, this unit can play both video and display photos, it comes in an 8" video size.

Custom video and graphics are also our specialty, so we are a complete system solution provider.

Example systems are:

- Interactive menu boards for pizza shops, and restaurants
- Dynamic video playback for ads on store shelves
- Interactive window displays
- Motion detecting walk by video starts

We are a complete solution provider and custom engineering shop so just ask us what you need done
